FRYE RESIDENCE

Oakland California 2004

The 9th St. Workshop Architects & Builders Collaborative, Oakland CA
Christopher Andrews, Christopher Linvill, & Mike Pond Architects

This project rebuilt a two story house on the foundation of a one story cottage. The design is influenced by the makeup of the neighborhood, which is characterized by densely packed early twentieth century craftsman houses. In this project we utilized a design/build process where many of the details are worked out during the construction.
