**HERCULES MAIN ST. CONCEPTUAL DESIGN
MIXED USE BUILDINGS STUDIES—COURTYARD TYPE**

HDR Urban Design with Christopher Andrews Architect & Catherine Chang Designer, 2006

These mixed use buildings types, all with housing above ground floor commercial uses, include lofts, courtyard buildings, and double loaded corridor apartments. They incorporate a range of patterns from the urban scale to the finer grain building scale. The Courtyard Type patterns include reinforcing the existing system of pedestrian paths and double aspect units with gallery surrounds.
