HOLY VIRGIN CHURCH

1995 – Constructed 1997 – Santa Rosa, California
R.G.B.C. (RGB Consulting- Black, Pontikis, Burda)

Design of a traditional Greek Orthodox Church with cross plan, including a dome, narthex, nave, semicircular apse, and a choir loft. The construction system is exposed superstructure with cast in place reinforced concrete, masonry in-fill walls and heavy timber roof. The dome is constructed of pre-cast concrete columns and panels, with timber frame and copper roofing. The designers were also the construction managers of the building.
