KORINTHOS APARTMENT BUILDING

1995 – Constructed 1997 – Nicosia, Cyprus
CY-ARC (Kyriokos Pontikis, Director)

Design of a six-unit apartment building with a subterranean parking. Entrance level apartments have gardens and porches. Upper level apartments have spacious living rooms and covered verandas overlooking the park. The construction system is cast in place reinforced concrete with in-fill terracotta block walls, stucco and plaster. The building was designed and constructed with the participation of the users. The architect was also the construction manager of the building. Handcrafted processes were employed for the creation of a humane building environment.
